DETAILED ACTION

Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 13-15 and 17 are, drawn to a method of diagnosing candida infection, classified in class 435, subclass 7.31.
 - II. Claims 9-12^{14,15} are, drawn to a method for assessing the prognosis of infection, classified in class 435, subclass 7.2.
 - III. Claim 16 is, drawn to a method of preparing an antigen, classified in class 435, subclass 69.3.

2. The inventions are distinct, each from the other because of the following reasons:

Groups I, II and III are drawn to different methods. The inventions are shown to be distinct because they are drawn to distinct methods, which differ in method objectives, method steps and material used.

3. The several inventions above are independent and distinct, each from the other for the reasons stated. They have acquired a separate status in the art as a separate subject for inventive effect and requires independent searches. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1645

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
